PROFESSIONAL SUMMARY

Motivated and detail-oriented Full Stack Developer with 1+ year of hands-on industry experience delivering scalable, production-grade web applications for real clients. Proficient in the MERN stack, Next.js, REST API design, and database management with MongoDB & Prisma. Demonstrated ability to build end-to-end client solutions — from matrimony platforms to event management systems — with seamless UI/UX, secure authentication, and robust admin panels. Skilled in automating business workflows using n8n and WhatsApp Cloud API, reducing manual operations significantly. Known for fast delivery, clean code, and leveraging modern AI-assisted tools to maximize productivity.

KEY STRENGTHS

 Fast Delivery End-to-End Development	 API Integration WhatsApp & Lead Automation	 Deployment Ready Vercel + CI/CD Pipelines	 AI-Assisted Dev Replit & Antigravity Tools
--	--	---	--

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Next.js
Backend	Node.js, Express.js, REST API Design
Database	MongoDB, Prisma ORM
DevOps	Vercel, Git, GitHub, GitLab, CI/CD (GitHub Actions)
Automation	n8n, WhatsApp Cloud API, Facebook Lead Ads Integration
Tools	Postman, VS Code
AI Tools	Replit, Antigravity

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan 2024 – Present

Matt Engineering Solution | Nagercoil, Tamil Nadu

- Built and deployed scalable client-facing web applications using MERN stack and Next.js, serving live production users.
- Designed RESTful APIs and managed relational/non-relational data with MongoDB and Prisma ORM, ensuring efficient query performance.
- Architected n8n automation pipelines connecting Facebook Lead Ads → Google Sheets → WhatsApp, cutting manual follow-up effort by ~80%.
- Integrated WhatsApp Cloud API to enable automated, real-time business communication for client lead management.
- Managed end-to-end deployments on Vercel with GitHub-integrated CI/CD workflows for continuous, zero-downtime releases.

- Delivered 4+ live client projects from requirement gathering to production deployment within agreed timelines.

PROJECTS

Nanjil Varankal — Matrimony Platform

MERN Stack | Client Project

Live: nanjilvarankal.com | Community-based matrimony service for the Nanjil region

- Developed a full-stack community matrimony platform enabling profile creation, partner search, and match management for regional users.
- Implemented secure JWT-based authentication, role-based access control, and a comprehensive admin panel for profile moderation.
- Built advanced matchmaking filters (age, religion, caste, location) with optimized MongoDB queries for fast search results.
- Designed a responsive UI with React.js ensuring seamless experience across mobile and desktop devices.

Joyce Decors — Event Management Platform

Next.js | Client Project

Live: joycedecors.in | Premium decoration & event management service, Nagercoil

- Built a full-featured event decoration platform for a live client business offering weddings, birthdays, corporate events, and more.
- Developed service catalog, gallery showcase, and inquiry/contact system with admin dashboard for managing bookings and customer leads.
- Implemented Next.js SSR for fast page loads and SEO optimization, improving the client's online visibility and lead generation.
- Integrated WhatsApp-based quick contact and Google Maps location embed for enhanced customer engagement.

Blockchain Voting System

Node.js | Blockchain

Tamper-proof digital voting using blockchain principles

- Designed a decentralized voting system using blockchain concepts to ensure vote immutability, transparency, and one-voter-one-vote integrity.
- Implemented cryptographic hashing for vote records, preventing tampering or duplicate submissions.

Fake Certificate Detection System

Node.js | MongoDB

Certificate authenticity verification platform

- Built a verification system using hash-based validation to detect fraudulent academic/professional certificates against a centralized registry.
- Enabled institutional users to register and verify certificates via a secure REST API interface.

Business Automation Workflows

n8n | WhatsApp Cloud API

Automated lead-to-customer pipeline for service businesses

- Designed end-to-end workflow: Facebook Lead Ads → Google Sheets (auto-logging) → WhatsApp (instant client notification).
- Reduced lead response time from hours to seconds, improving client conversion rates for service-based businesses.

EDUCATION

B.E. Computer Science Engineering

2022 – 2025

Lord Jegannath College of Engineering | Anna University | Nagercoil, Tamil Nadu

Diploma in Mechanical Engineering

2018 – 2020

Lord Jegannath College of Engineering | Nagercoil, Tamil Nadu

CERTIFICATIONS

- Full Stack Developer — IIT Madras (GUVI Academy) | Covered React.js, Node.js, MongoDB, Express.js

CURRENTLY LEARNING

- TypeScript — for strongly typed, maintainable large-scale applications
- Docker & containerization — for scalable deployment in service-based IT environments
- Advanced System Design — microservices architecture and scalability patterns

LANGUAGES

Tamil (Native) • English (Professional Working Proficiency)
