kalanjiachandru1@gmail.com

Key skills

- Redux
- Rest API Integration
- SQL Database
- Node.js
- Prismic
- Nextjs
- Logical Approach
- Problem Solving
- CSS
- Html/Css
- TypeScript
- React.js
- Javascript
- Frontend Development
- Development
- SEO
- Web Accessibility
- Git Collaboration
- Cross-Browser
- Webpack
- Babel
- Express
- MongoDB

Personal Information

City **Nagercoil**
Country **INDIA**

Profile Summary

Front-End Developer with expertise in creating dynamic and responsive web applications using a range of modern technologies. Skilled in HTML, CSS, JavaScript, React.js, Redux, and Next.js, I have a strong command of styling frameworks like Tailwind CSS, and Material UI. Experienced in integrating REST APIs and building full-stack applications with Node.js, Prisma, and MongoDB. With a focus on clean, efficient code, I excel at translating UI/UX designs from Figma into high-quality front-end components. Known for logical problem-solving and delivering scalable solutions in fast-paced environments

Education

B.Tech/B.E., 2022

PRIST University, Chennai

Work Experience

Apr 2022 - Present

Front End Developer

Matt Engineering Solutions

- Developed dynamic and user-friendly interfaces using React.js and its ecosystem, resulting in enhanced user experience.

- Utilized Next.js for server-side rendering, leading to improved performance of web applications.

- Efficiently managed database models and interactions using Prisma as ORM, ensuring robust and scalable applications.

- Designed responsive and visually appealing user interfaces by employing Tailwind CSS, resulting in highly maintainable code.

- Delivered high-performance web applications with a strong focus on user experience and scalability, resulting in enhanced overall application performance.

As a front-end developer working on the Matt Track Mate project, I'm leveraging a robust tech stack to create a comprehensive CRM application. By utilizing Next.js, I'm able to build a high-performance and scalable web application with server-side rendering, enabling faster page loads and improved SEO. Tailwind CSS, a utility-first CSS framework, is being employed to streamline the styling process and ensure a consistent visual experience across the application. To manage the project's data, I'm integrating MySQL as the underlying database, providing a reliable and efficient storage solution. TypeScript, a typed superset of JavaScript, is being used to enhance code quality and maintainability by catching potential errors early in the development process. Prisma, a powerful ORM (Object-Relational Mapper), acts as a bridge between the application's code and the MySQL database, simplifying data access and manipulation. Tools used in project=[Next.js,Tailwind css,MySQL, Prisma, Typescript]
