PROFILE

Passionate and **experienced Front-End Web Developer with 2 years of expertise** in building robust web applications. Proficient in front-end technologies such as HTML, CSS, JavaScript, React, and Next.js, as well as back-end development using Node.js, Express. Skilled in working with databases like MongoDB. Driven to create seamless user experiences and efficient server-side functionality. Enthusiastic about leveraging my technical skills to contribute to innovative projects, collaborating with dynamic teams, and continuously learning and applying cutting-edge technologies to drive the success of web development initiatives.

EXPERIENCE

Fullstack Web Developer

Matt Engineering Solutions

March 2022 – Present

Nagercoil, Kanyakumari

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, and modern frameworks such as React and Next.js.
- Designed and implemented RESTful APIs and microservices using Node.js, Express, and other backend technologies.
- Managed database design and development with SQL and NoSQL databases, ensuring efficient data storage and retrieval.
- Collaborated with cross-functional teams to gather requirements, plan projects, and deliver solutions that meet client needs.
- Utilized version control systems like Git for efficient code management and collaboration.

TECHNICAL SKILLS

HTML, **CSS**, **JavaScript** (Programming Language), **TypeScript**, **React** (JavaScript Library), **Next.js** (React Framework), **Tailwind CSS** (CSS Framework), **Node.js** (JavaScript Runtime), **Express** (Node.js Framework), **MongoDB** (NoSQL Database), **Prisma** (Database ORM), **Git** (Version Control)

PROJECTS

iCare4DM

- Developed a comprehensive health management application for **diabetic patients**, integrating various features for assessment, tracking, community engagement, and consultation.
- Implemented user authentication using **Firebase** and designed a user-friendly interface for patients to complete the TTM assessment questionnaire consisting of 24 multiple-choice questions.
- Utilized **Next.js 13**, **Redux Toolkit**, **Prisma**, **PostgreSQL**, **Material-UI**, and **Firebase** to build a responsive and scalable web application.
- Incorporated physical activity, food, sleep, and weight tracking functionalities to help patients monitor and manage their health effectively.
- Integrated a **chatbot** feature powered by **GPT** to provide personalized assistance and support to users, enhancing their engagement and experience.
- Implemented a **social community** feature where users can connect with other diabetic patients, share experiences, create posts, and interact by liking and commenting.
- Developed a consultation section allowing patients to choose and request consultations with doctors based on their expertise and experience.

EDUCATION

University College of Engineering

Mechanical Engineering (BE)

Nagercoil, Tamil Nadu

AU. 2015 – April 2019
